

College Intern Positions Available: **Technical Laboratory Assistant**

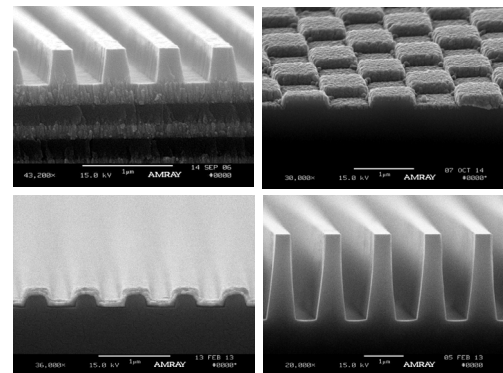

Company: Plymouth Grating Laboratory (PGL) is a small, focused technology company that specializes in developing and manufacturing optical diffraction gratings using photolithography for high-energy and other laser applications. We are a local company in Carver, MA, just outside of Plymouth, and about 45 miles south of Boston.

Position Summary: PGL is currently seeking students to assist in development, production, and characterization of optics and coatings. This exciting opportunity will provide students who have a strong interest in physics, engineering, and technology with valuable laboratory experience.

Required Skills:

- Ability to follow laboratory procedures
- Good computer and math skills
- Attention to detail
- Desire and ability to learn new and challenging concepts

Education: Currently enrolled in a college physical science or engineering degree program, with at least freshmen-level math, physics, and/or chemistry courses completed.
